1. Scope of Application

The Basel Pillar III disclosures contained herein relate to American Express Banking Corp. – India Branch, herein after referred to as "the Bank" for the period July 1, 2014 – September 30, 2014. American Express Banking Corporation (AEBC) is organized under the New York State Banking Law and incorporated in the United States of America. AEBC is a wholly owned subsidiary of American Express Company, and conducts business through a branch office in India. In India, AEBC holds a banking license issued by the Reserve Bank of India (RBI) and is subject to the provisions of the Banking Regulation Act. AEBC India's operations are confined to three business areas viz. card operations, distribution of travellers' cheques and acceptance of institutional deposits.

The disclosures have been compiled in accordance with Reserve Bank of India's Prudential Guidelines on Implementation of New Capital Adequacy Framework vide their Circular DBOD.No.BP.BC.2/21.06.201/2013-14 dated July 1, 2013 and the amendments thereto issued from time to time. As per the RBI guidelines, the Basel III Capital Regulations are effective April 1, 2013. Accordingly, previous year figures of capital computation and Risk Weighted Assets are not comparable.

The Bank does not have any subsidiaries, nor does it hold any significant stake in any companies. Further, the Bank is not required to prepare consolidated financial statements. No quantitative disclosures are required to be made, as the Bank has no subsidiaries. The Bank also does not have any interest in insurance entities.

2. Capital Adequacy

The Bank's operations are confined to three business areas viz. card operations (including prepaid cards), distribution of travelers' cheques and acceptance of institutional deposits. The Bank has put in place policies and procedures to address the various risks associated with these business segments. Independent committees manage relevant risk areas and define the requirement of the capital that the bank may have to maintain to cover these risks. The Bank has implemented an Internal Capital Adequacy Assessment Process to assess all the material risks associated with its business and to ensure that meets the Bank's objective to maintain adequate capital of sufficient quality and quantity at all times to act as a safety net for the variety of risks the Bank is exposed to in its ordinary course of business and to meet all regulatory requirements. While the RBI prescribed regulatory Capital to Risk Weighted Asset Ratio (CRAR) sets the minimum floor, the Bank strives to keep its CRAR above the statutory requirement, with the buffer serving as a cushion to meet any unforeseen event.

The India Country ALCO is the management's oversight committee on all matters pertaining to investment management, capital management, market risk management, liquidity risk management etc.

India Country ALCO comprises of the AEBC India Chief Executive Officer, AEBC India Treasurer, AEBC India Chief Financial Officer, AEBC India Financial Controller, AEBC India Branch Manager, AEBC India Head Risk Management and AEBC India Market Compliance Officer.

In addition, to the India Country ALCO, the Bank has another risk management committee referred to as India Risk Management Committee which is responsible for evaluating and monitoring the overall risks faced by AEBC India including liquidity risk. It is an oversight committee of the AEBC India Board on all matters pertaining to management of Liquidity Risk, Market Risk, Credit Risk and Operational Risk

As prescribed in the prudential guidelines issued by the Reserve Bank of India, for computing capital requirement, the Bank has adopted :

(a) Standardized Approach (SA) for credit risk,
(b) Standardized Duration Approach (SDA) for market risk, and
(c) Basic Indicator Approach (BIA) for operational risk.

Quantitative Disclosure:

As at September 30, 2014 **(Amount Rs.'000)**

Tier I Ratio	16.40%
Total Capital Ratio	20.01%

3. Credit Risk - General Disclosures

Credit Risk is defined as the risk of loss to the Bank due to non-payment of amounts that are contractually owed to the Bank. The Bank's Management and the Board of Directors continuously monitor credit risk to ensure that prudent lending criteria are established and complied with to minimize the Bank's exposure to credit risk. The Bank's lending are only in relation to card issuance business and loans to staff.

It is the policy of the Bank to

- Extend Credit only on a safe, sound and collectible basis.
- Extend Credit in an economically sound fashion.
- Extend Credit only in compliance with applicable law and regulation and the policies of the Bank and in full consideration of applicable regulatory guidance.
- Document credit decisions.
- Adopt and use best-in-class risk management tools and practices.

- Require its vendors, including its affiliates, to act in accordance with the policies of the Bank when conducting business on the Bank's behalf.

The Bank has established policies and procedures to control and mange the credit risk. These policies and procedures, in particular:

- Establish the governance structure through which credit risk will be identified, assessed, controlled, monitored and reported.
- Details the credit products and services that the Bank may offer.
- Specifies certain key metrics to be used in managing credit risk.
- Establishes the conditions under which exceptions to credit policy may occur.

Management can never eliminate the Bank's credit risk. However, consistent application of the above practices will result in the credit risk being controlled to an acceptable level. Therefore, Management and the Board of Directors continuously monitor credit risk to ensure that prudent lending criteria are established and complied with so as to minimize the Bank's exposure to credit risk.

The Bank follows the RBI guidelines for asset classification. Accordingly, card receivables are treated as non-performing, if any amount is overdue for a period of more than 90 days.

The Bank also identifies all card accounts with delinquencies and writes off in the books of accounts, the outstanding card receivables, which are 180 days past due. In addition, accelerated write off is effected where it is evident that the outstanding is unlikely to be recovered.

Provision for Non Performing Assets and Standard Assets are made in compliance with the prudential norms prescribed by Reserve Bank of India.

4. Credit Risk: Disclosures for Portfolios Subject to Standardised Approach.

The Bank lending business is confined to card lending through its card issuance business and loans to staff. In view of this limited lending activity, the Bank does not use any rating assigned by the eligible external credit rating agencies for measuring credit risk. The card receivables and loans to staff come under the Specified Category as per the RBI guidelines and attract the risk weight as prescribed therein. All exposures to scheduled banks have been reckoned at 20% as per the RBI guidelines, as the counterparty banks have capital adequacy ratio of 9% and above.

Quantitative Disclosure:

Amount of a bank's outstanding by risk weight are as follows:

As at September 30, 2014 **(Amount Rs.'000)**

Risk Weight Applied	Book Value of Asset
Below 100 % risk weight	2,089,617
100 % risk weight	2,199,821
More than 100 % risk weight	22,142,956
Deducted (in computation of Net Owned Funds)	-

5. Credit Risk Mitigation: Disclosures for Standardised Approach

The Bank's advances arise from its card operations and there are normally no collaterals for these lending. The Bank does not use any Credit Risk Mitigation tools as outlined in the RBI guidelines on Implementation of New Capital Adequacy Framework.

6. Securitization : Disclosure for Standardized Approach

The Bank does not have any securitization exposure.

7. Market Risk in Trading Book

Market risk is the risk to earnings resulting from unfavorable movements in market risk factors such as interest rates.

The Bank invests only in Government Treasury Bills to meet the Statutory Liquidity Ratio (SLR) requirements and these investments are held under the Available for Sale (AFS) category. These instruments do not carry any credit risk. The general market risk capital charge towards interest rate risk on these instruments is provided as per the extant RBI guidelines, using the Standardised Duration Approach.

Capital Requirements

As at September 30, 2014 **(Amount Rs.'000)**

Interest rate Risk	23,097
Equity position risk; and	-
Foreign exchange risk.	-

8. Operational Risk

Operational Risk is defined as the risk of not achieving business objective due to inadequate or failed processes, people or information systems, or to the external environment, including failures to comply with laws and regulations. It includes legal risk, but does not include strategic and reputation risks.

The Bank has in place an Operational Risk Management Policy framework that defines the key elements of Operational Risk Management. The Operational Risk Management framework defines governance principles, globally accepted risk assessment methodologies and processes for capturing and analyzing Operational Risk events and exposures. Internal and external drivers shape the framework, including regulatory requirements and market pressures. The framework and its supporting programs are designed to be adaptable to address emerging risks and external influences as they develop.

The Bank has adopted the Basic Indicator Approach (BIA) for measuring the capital requirements for operational risk.

9. Interest Rate Risk in the Banking Book

Asset Liability Management (ALM) risk management process consists of management of liquidity risk and Interest Rate Risk in the Banking Book ('IRRBB').

Liquidity Risk is the inability of the Bank to meet its ongoing financial and business obligations, as they become due, at a reasonable cost. The objective of funding and liquidity risk management is to enable continuous access to liquidity sources for the Bank at all times. In order to meet the said objectives the Bank diversifies its funding during business-as-usual periods by source, maturity, instrument and also establishes a contingent funding plan which may be accessed in times of stress.

General principles and the overall framework for managing Liquidity risk is defined in the Bank's Treasury Policy. The Bank manages liquidity risk by monitoring Board approved limits for the Statement of structural Liquidity and Stock ratios.

Interest rate risk in the banking book represents the risk that a movement in interest rates will have an adverse effect on the interest rate sensitive assets and liabilities held by the Bank in the banking book. Interest Rate risk is primarily generated by funding card member receivables and investments with different tenure borrowings and deposits. These assets and liabilities generally do not create naturally off-setting positions with respect to re-pricing or maturity characteristics.

The Banks objective is to identify and manage interest rate risk exposures in the context of its overall business model while supporting sustainable earnings growth. This is accomplished by identifying, measuring and reporting such exposures on a monthly basis and managing the same within predefined limits.

Interest Rate Risk is managed and monitored by the India Country Asset Liability Management Committee (ALCO) of the Bank in accordance with Board approved policies and limits. The India Risk Management Committee of the Bank also oversees and monitors interest rate risk as part of its enterprise wide risk related responsibilities

General principles and the overall framework for managing market risk, including the interest rate risk are defined in the Bank's Treasury Policy. The Bank measures interest rate risk from two separate, but complimentary perspectives i.e. risk that earnings decline (EaR) and risk that economic value of equity (EVE) of the Bank declines. In addition Interest rate risk is also managed by monitoring limits for the different time buckets in the Statement of Interest Rate Sensitivity (IRS).

EaR measures the adverse potential impact on the projected 12 month pre-tax income of the Bank due to a a 100 bps parallel shift in yield curve on the assets and liabilities of the Bank.

EVE measures the risk of decline in the economic value of equity of the Bank as a result of changes in market factors i.e 200 bps parallel shift in yield curve.
