Explaining Interest Rates

Simple Rates: We use the Simple Rate to work out the interest due on your unpaid transactions including any unpaid interest. We calculate this interest daily. We add the total of the daily interest to your account every month on your statement date. This rate moves in line with the Bank of England Base Rate.

Compounding Interest: If you do not pay your balance in full each month by the date set out in your statement we'll charge interest on any unpaid interest that has fallen due even where you pay the minimum payment. This is called 'compounding' and means that you are paying interest on interest.

We have provided the Compound Rates for information only. This is to show you the effect of compounding on the Simple Rate over the course of a year. Because the Compound Rate takes account of the payment of interest on interest, it will be higher than your Simple Rate. We don't use the Compound Rate to work out the interest you owe.
